# **Installing network**

### [Connecting Network]

Connect the wireless IP router to an air conditioner.

0

### [Registering service]

Access the http://www.samsungsmartappliance.com and register the service.

# Checking before using a wireless router

- \* This Wi-Fi Aircon support only below three encryption.
  - Open (No encryption), WPA/TKIP, WPA2/AES
  - You may not be able to establish Wi-Fi connection if other type of encryption is used.
- For Wi-Fi Aircon installation, select indoor unit location near to wireless router. In case Wi-Fi signal strength is weakened, Smart App. may be disconnected depending on the Wi-Fi signal strength.
- Smart-Phone should be in the Wi-Fi signal zone to use Smart App.
- For Mobile broadband internet access, Smart App. can be used when Mobile Broadband Dongle is activated to use Wi-Fi.
- This product supports only DHCP(Dynamic Host Configuration Protocol). If users use an existing wireless router, the DHCP server option function should be activated.
- Select a channel for the wireless router that is not currently being used.
- If a wireless router is connected by other than the above modes, the router may not be connected with the air conditioner or may not work. To use 802.11n, using WPA2/AES is recommended.
- The quality of wireless network connection can be affected by the surrounding wireless environment.
- If an internet service provider has permanently registered the users PC or MAC address (a unique identifying number), the air conditioner might not be connected to internet. When appliances other than a PC are to be connected to Internet, ask your ISP (Internet service provider) about the procedures required to connect to the internet.
- If your internet service provider requires an ID or a password to connect to the internet, your air conditioner may not be able to connect to the internet. If this is the case, you must enter your ID or password when connecting to the internet.
- The internet connection may fail because of a firewall problem. If this is the case, contact your internet service provider.
- If you cannot connect to the internet even after you have followed the procedures of your internet service provider, please contact a samsung service center.

# **Connecting network**

### Connecting the wireless IP router with an air conditioner

- For wireless router installation, refer to the user manual of the corresponding router.
- Samsung smart air conditioner supports the communication protocols of IEEE802.11 b/g/n(2.4Ghz).
- For wireless router installation, refer to the user manual of each manufacturing company.
   Samsung does not provide customers with the wireless router manual.
- Uncertified router may not be able to connect with an air conditioner.
- Certified router has the logo of below on the package or user manual.

ME Best model WiFi IB DB68-04538A EN.indd 3

01 PREPARATION

# **Connecting network**

Checking Wi-Fi module installation

- Open the filter cover and check the Wi-Fi Module (①) attached on the panel front. The connection status between the Wi-Fi module and the wireless router can be checked by the Wi-Fi module described next page.
- ► To replace the Wi-Fi module(Assembling or disassembling), follow the procedure below.

• When changing the Wi-Fi module, you should check the MAC attached on the module or bottom part of the indoor unit and modify the device information at 'Registering service'.

### Disassembling the Wi-Fi module

- 1. Remove the cover of the sub panel.
- 2. Disconnect the wire of the Wi-Fi module.
- 3. Release the hook on the top of the Wi-Fi module and push it up to disassemble it.

# <image>

- 1. Push the Wi-Fi module down into a slot and fix the hook on the top.
- 2. Connect the wire of the Wi-Fi module.
- 3. Close the cover of the sub panel.

**(** 

### Checking the connection status on the panel-display

- Wi-Fi display description
- 1) Wi-Fi Indicator LED off : Not connected with AP Not connected with internet
- 2) Wi-Fi Indicator LED blinking : Connected with AP Not connected with internet
- Wi-Fi Indicator LED on : Connected with AP Connected with internet

### English-5

( )

# **Connecting network**

### Checking network

Check whether the wireless router connects with a smart phone.

When the internet is not connected with a smart phone, the network function of the air conditioner cannot be used.

- 1. Search for the wireless router on the smart phone.
- 2. Select the wireless router you are using now on the searched wireless router list.
- 3. Check whether the smart phone can access the website http://www.samsungsmartappliance.com by the internet.

If you need ID and Password to use the internet at commercial building, inform the network administrator of MAC
address of your air conditioner and get the approval of internet use for the air conditioner.

• If private program installation of ISP is needed for internet use, the air conditioner cannot be connected with the internet.

(•)

Connecting the wireless router with an air conditioner by the network (Select one of the 2 methods)

### Connecting network with a Smart phone APP

Setting application on Samsung smart phone (Android based smart phone)

 Android based smart phone users can download the Smart A/C application by searching 'Samsung, Smart, A/C, AC, Air, Conditioner' at android market or Samsung Apps.

- 1. After operating Smart A/C application, press the [Network Setting] tab.
- 2. [Remote control TYPE 1] After pressing and holding the [Timer] button on the remote control for 4 seconds. [Remote control TYPE 2] After pressing the [2ndF] button on the remote controller, press the [Wi-Fi] button.
  - RP message will be displayed on the front display panel of the air conditioner.

3. Press the [Setting Start] tab.

**(** 

• The program version of the picture in this manual is only for reference. Please according to the actual.

- 4. Select the wireless router that you are using now.
  - When using free wireless router, refer to the corresponding user manual for password.
- 5. After entering the password of selected wireless router, press the [OK] tab.
  - When the password has not been set, press the [OK] tab without entering the password.
- 6. When 'Transfer complete' pop up comes on, press the [OK] tab.
  - When the Wi-Fi ( 🛜 ) indicator is on, the air conditioner is connected with wireless router and the internet.
  - When the Wi-Fi ( right indicator blinks, the air conditioner is connected to wireless router but not with internet. In this case, check the internet connection.
  - When the Wi-Fi ( 🛜 ) indicator is off, the air conditioner is not connected with wireless router and the internet.
- 7. After 1~2 minutes, if the Wi-Fi LED of the air conditioner is still on, it means the configuration has succeeded. At this point, you can use smart phone to control the system.

Smart A/C application is optimized with Samsung smart phones. Supported models are; Samsung Galaxy Phone
series and other models can be added in the future. When the Smart A/C application is used with other smart
phones, some functions may not work.

### Setting application on iPhone

NOTE

**(** 

• iPhone users can download the Smart A/C application by searching 'Samsung, Smart, A/C, AC, Air, Conditioner' at Apple App store.

(

 [Remote control TYPE 1] After pressing and holding the [Timer] button on the remote control for 4 seconds. [Remote control TYPE 2] After pressing the [2ndF] button on the remote controller, press the [Wi-Fi] button.
 - RP message will be displayed on the front display panel of the air conditioner.

- 2. Select [Settings]  $\rightarrow$  [Wi-Fi] on your iPhone.
- 3. From the list of Wi-Fi, select SMARTAIRCON and enter'1111122222' as password.
- 4. After operating Samsung Smart A/C application, press the [Network Setting] tab.

  - When the password has not been set, press the [OK] tab without entering the password.
- 8. Enter the information of wireless router and press the [OK] tab.
  - Required information is; SSID, Security type, Encryption type and Password.

- 9. When 'Transfer complete' pop up comes on, press the [OK] tab.
- 10. Select [Settings] → [Wi-Fi] on your iPhone.
- 11. Select the wireless router that you are using, and enter the password.
  - When the Wi-Fi ( 🛜 ) indicator is on, the air conditioner is connected with wireless router and the internet.
  - When the Wi-Fi ( refer to wireless router but not with internet. In this case, check the internet connection.
  - When the Wi-Fi ( 🛜 ) indicator is off, the air conditioner is not connected with wireless router and the internet.
- 12. After 2 minutes, if the Wi-Fi LED of the air conditioner is still on, it means the configuration has succeeded. At this point, you can use smart phone to control the system.

• When searching a network by pressing the [Wi-Fi] button, RP message will be displayed on the front display a maximum of 5 minutes.

Supported models are; iPhone 4, iPhone 4S, iPhone5 and other models can be added in the future.

### Connecting network with WPS setting

- 1. [Remote control TYPE 1] After pressing and holding the [Setting] button on the remote control for 4 seconds. [Remote control TYPE 2] After pressing the [2ndF] button on the remote controller, press the [WPS] button.
  - Lu + P5 message will be displayed on the front display panel of the air conditioner.

- 2. Press [WPS] button on the wireless router that will be connected to an air conditioner and operate the WPS function of the wireless router. (The location of WPS button may be different depending on the wireless manufacturing company.)
- 3. After connecting the air conditioner with the wireless router correctly, the Wi-Fi ( 🕤 ) light on the Wi-Fi module will be on.
  - Check whether the wireless router supports Wi-Fi Protected Setup™(WPS).
  - · Check whether the wireless router has WPS button.
  - Samsung smart air conditioner uses PBC method of WPS.
  - When searching a network by pressing [WPS] button, the remote controller will not work for a maximum of 2 minutes.
  - Be careful when pressing the WPS button because if you hold the WPS button for a long time, the set value of the wireless router will be initialized with some types of wireless router.
  - · Operating wireless router through WPS mode might be different depending on the manufacturing company. Therefore, please refer to the user manual of your wireless router.
- Ŵ CAUTION

₽

NOTE

- If the wireless router(AP) is not authenticated with WPS, connection failure might occur.
- Some of the wireless routers (including wireless routers that are not authenticated with WPS) may lose connection with previously connected devices when the air conditioner establishes connection with wireless router.

# **Operating Smart A/C application**

- Android based smart phone users can download the Smart A/C application by searching 'Smart Air Conditioner' at android market(Google Play Store) or Samsung Apps.
- ▶ iPhone users can download the Smart A/C application by searching 'Smart Air Conditioner' at Apple APP store.

### Home screen

In-home	You can control your air conditioner at home.
Out-of-home	You can control your air conditioner outside your home.
Demo Play	You can test the functions of Smart A/C application.
Network Setting	Set the air conditioner network.

### Accessing In-home

▶ Use Smart A/C application for the replacement of a remote controller at home.

- 1. Press the [In-home] tab on home screen.
- 2. Search for the air conditioner.
  - When you cannot find the air conditioner you want to select, press the [Refresh] to search it again.
- 3. Select the air conditioner you want to access.

**BASIC FUNCTION** 

(۵

Before you first access your air conditioner, you should get authentication.
 When authentication pop-up comes on, turn on the air conditioner within 20seconds.
 After getting the authentication successfully, you can log on to the air conditioner.

### Controlling an air conditioner

• Check the control function of the air conditioner at AC control screen.

Mode	Set the basic operation of the air conditioner.
Option	Set the additional function of the air conditioner.
Timer	Set the On or Off timer function of the air conditioner.
Settings	Set the name of network or air conditioner.

• Set the operation mode of the air conditioner by pressing the [Mode] tab.

1	Power ON/OFF	Turn the air conditioner on or off.
2	Mode	Select Auto, Cool, Dry, Fan, or Heat.
3	Desired temperature	Select the desired temperature of the air conditioner.
4	Current temperature	Display current temperature of indoor room.

# **Operating Smart A/C application**

### Setting additional functions of the air conditioner

- You can control the additional functions the air conditioner supports.
- ▶ The additional functions will be activated depending on the air conditioner functions.
- My Wind, Usage, Filter Replacement, Error Notification, Color Of Wind function can be controlled only through the application. You must be connected to Wi-Fi and run the application in order to use these functions.

1. The user save the function for me with establishment.

Air-conditioner can be controlled easily.

1. Press the [Option] tab at the bottom of the screen.

2. Select the operation mode or additional functions you want.

 For the details of each additional function, refer to the user manual of each air conditioner.

- After pressing the[Timer] tab at the bottom of the screen, press the [On Timer] or [Off Timer] tab.
   When you want to set on time, press the [On Timer] tab or [Off Timer] tab for off time.
- 2. Press the [+], [-] or [AM], [PM] tab to set the on time or off time.
- 3. After setting repetition cycle, press the [OK] tab.

• On time and off time cannot be set at the same time.

### English-16
