Safety Warnings

- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure they do not play with the appliance.
- Ensure the cooker hood is switched off before carrying out maintenance, to avoid any possibility of electric shock.
- Grease filters must be removed every four weeks (maximum) for cleaning to reduce the risk of fire.
- Do not flambé under the cooker hood.
- This cooker hood is not recommended for barbecues.
- The exhaust air from the cooker hood must not be discharged into any heating flue, which may carry combustion products from other sources.
- Exhaust air must not be discharged into a wall cavity, unless the cavity is designed for the purpose.
- There must be adequate ventilation of the room when the cooker hood is used at the same time as appliances burning gas or other fuels.
- Always cover lit gas burners with pots or pans when the cooker hood is in use.
- Always switch off gas burners before you remove pots or pans.
- CAUTION: Accessible parts may become hot when used with cooking appliance.
- Regulations concerning the discharge of air have to be fulfilled.

Cleaning

Wipe the cooker hood body and flue with a sponge or soft cloth soaked in warm soapy water. Do not use oven cleaners or other abrasive materials.

Electrical Connection

- Check that the mains voltage matches with the voltage on the data plate inside the cooker hood.
- Check that the installation complies with standards of local gas and electricity authorities.
- If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

Accessories

- Use 125mm round exhaust ducting for best performance.
- When using flexible duct always install duct with the wire helix pulled taut to minimise pressure loss.
- Try to keep exhaust duct short and straight.
- Keep bends in the exhaust duct to a minimum.
- Do not reduce the size or restrict exhaust duct.

It is recommended that the unit be positioned as close as possible to 600mm (electric hobs), 650mm (gas hobs), and no further from the hob than 800mm. The unit becomes less effective as the distance from the cooking surface to the hood increases.

Technical drawing of the 1000W LED strip light assembly. The drawing shows the main unit with dimensions: 80mm width, 210mm height, 100mm depth, 770mm length, and 898.5mm total length. A cable is connected to the side. A detail view shows a hole with a diameter of $\varnothing 12$. A separate component, likely a mounting rail, is shown with dimensions: 175mm height, 280mm width, and 158mm length. A small dimension of 42mm is also indicated.

DUCTING INSTALLATION

When installing with ducting pipe the Duct spigot must be fitted to the ducting hole on top of the body of the cooker hood

When installed in recirculating mode the ducting hole cover **must** be fitted

INSTALLATION USING THE SUPPLIED DRAWER FASCIA

FOR MODELS: WRH605I • WRH608I • WRH908I • REHR6 • REHR9 • RRE634 • RRE934

Standard ducted installation calls for a door extension of 130mm whether the client opts to use the supplied draw fascia or a custom fascia of the same dimensions as that supplied.

RECIRCULATING VENT INSTALLATION

FOR MODELS: (WRH608I • WRH908I • RRE634 • RRE934) ** • (RRE635 already fitted with 70mm front panel)
