G3 SALON PRO

Professional Curling Iron

Congratulations!

You now own one of the most innovative hairstyling tools to be introduced to the hair industry;
the *Karmin G3 Salon Pro Professional Clipless Curling Iron!*

Please be sure to read through this manual before using your new *Karmin Clipless Curling Iron* in order to keep your styling iron in top performing shape as well as for helpful styling tips. Start creating your natural looking waves and curls today with the *Karmin G3 Salon Pro Clipless Curling Iron!*

About Your New Karmin G3 Salon Pro Clipless Curling Iron

This *Clipless Curling Iron* has been designed to help you to create flawless, natural looking curls and waves effortlessly and in less time than a conventional spring curling iron. Ceramic and tourmaline technology leave hair smooth, shiny and full of bounce, creating curly and wavy hairstyles that last all day. The temperature of 410 F (210 C) makes the *Karmin G3 Salon Pro Clipless Curling Iron* perfect for all hair types and textures.

Safety Instructions

When using electrical appliances, especially if children are present, basic safety precautions should be followed at all times;

Please read all of the instructions before using this appliance.

- **ALWAYS** unplug your curling iron after use.
- Do **NOT** touch the heating barrel.
- **ALWAYS** keep your curling iron away from water to avoid damage and electric shock.

- As with most electrical appliances, electrical ports are electrically charged even when the switch is off (so please be careful).
- Do **NOT** reach for any electrical appliance that has fallen into water, if this happens, unplug the appliance immediately.
- Do **NOT** use any attachments that are not recommended by the manufacturer.
- Do **NOT** use this curling iron for any other use other than what is stated in this manual.
- **NEVER** operate the appliance if it has a damaged cord or plug, if it is not working properly or has fallen into water.

Please Note

The *Karmin G3 Salon Pro Clipless Curling Iron* is designed to provide soft, smooth curls and waves without using any extra styling aids such as hair spray and shine serums, however, if your hair is dry, damaged or difficult to hold curls you may wish to use styling products such as a shine serum or curl enhancer. A flexible hold hairspray is also a great way to help hold your style and still allow natural movement.

Helpful Styling Tips

1. Use your curling iron only after you have washed your hair. This will prevent hair residue from building up on the plates of your styling iron which can cause damage to your hair.
2. Use your curling iron on dry hair only. This Professional Curling Iron is meant for dry hair styling only, do not use on damp or wet hair, as hair becomes more prone to damage when not completely dry.
3. For bleached, fragile, damaged and/or fine hair types, the lowest temperature setting is recommended.
4. For coarse, thick and/or resistant hair that is in a healthy condition, the maximum heat setting is recommended to save time and effort.

5. It is highly recommended that with any type of heat styling, that you use a heat protectant styling aid on your hair first, to keep it looking its best. We recommend *Pro Naturals Moroccan Argan Oil with Heat Protectant* which is available online.

* *As a safety precaution it is highly recommended that you wear the heat protective glove that came with your curling iron to avoid burning yourself as the barrel is extremely hot.*

Creating Soft Curls Using Your Karmin G3 Salon Pro Clipless Curling Iron

1. Once your hair has been washed and dried, section hair in layers so that you can work from the under layers of your hair and up.
2. Hold your curling iron so that the handle is facing upward and the end of the barrel is facing downward.
3. Taking a half inch section of hair at a time, use your free hand to wrap the section of hair around the barrel, starting from the top near the handle, towards the tip of the barrel.

Creating Large Curls Using Your Karmin G3 Salon Pro Clipless Curling Iron

1. Once your hair has been washed and dried, section hair in layers so that you can work from the under layers of your hair and up.
2. Hold your curling iron so that the handle is facing upward and the end of the barrel is facing downward.
3. Taking 1 - 1.5 inch sections of hair at a time, use your free hand to wrap the section of hair around the barrel, starting from the top near the handle, towards the tip of the barrel.

4. To create larger, looser curls you want to wrap the sections of hair tightly yet spaced around the barrel of the iron, you will see the barrel in between the hair as it is wrapped around.
5. Hold the section of hair for 5 - 10 seconds, making sure to keep your fingers away from the barrel, before releasing the hair. Repeat until all of your hair has been curled.

Creating Natural Looking Waves Using Your Karmin G3 Salon Pro Clipless Curling Iron

1. Once your hair has been washed and dried, section hair in layers so that you can work from the under layers of your hair and up.
2. Hold your curling iron so that the handle is facing upward and the end of the barrel is facing downward.
3. Taking a 2 inch section of hair at a time, use your free hand to wrap the section of hair around the barrel, starting from the top near the handle, towards the tip of the barrel.

4. To create natural looking waves you want to wrap the sections of hair loosely and spaced around the barrel of the iron, you will see the barrel in between the hair as it is wrapped around.
5. Hold the section of hair for 5 - 10 seconds, making sure to keep your fingers away from the barrel, before releasing the hair. Repeat until all of your hair is wavy.

Creating a Modern Hairstyle Using Your Karmin G3 Salon Pro Clipless Curling Iron

1. For a more modern hairstyle, leave a couple of inches near your roots straight.
2. Use a large paddle to brush out your large curls for a style that is wavy and full of volume.
3. Use your fingers to separate and shape curls or waves after styling.
4. Have fun with your *Karmin G3 Salon Pro Clipless Curling Iron* and create a look all your own by using all of the above styling techniques randomly on your hair.

How to Take Care of Your Karmin G3 Salon Pro Clipless Curling Iron

Properly cleaning and storing your styling iron will ensure that your new appliance performs at its best at all times.

- **ALWAYS** turn off and unplug your curling iron before cleaning and storing it.
- When cleaning your curling iron always be sure that it is unplugged and cool. Using a soft, clean cloth, gently wipe the barrel and handle of your curling iron. It is recommended to do this after every use to avoid residue from building up on the barrel of your curling iron.
- **NEVER** use any type of chemical cleaner, thinner, gasoline, alcohol or any other household cleaner as this will cause damage to your curling iron.

- To properly store your curling iron, hang it up using the loop at the base of the handle or in a drawer.
- Do **NOT** wrap the cord around the curling iron. You may loop it loosely for storage purposes, being careful not to fold or crimp the cord.

Warranty

This product is guaranteed from defects to be found by faulty workmanship or material for the period of 2 Years from the date of purchase. The proof of date of sale is required for the validity of the guarantee. This guarantee is no longer valid if the damage has been caused by the product being dropped or been repaired by any unauthorized person.
